

Objects vs. Arrays

```
var grocery = [ 'lettuce', 'snaple', 'cake' ] ;
```

140	0	'lettuce'
141	1	'snaple'
142	2	'cake'
143		

← grocery

```
var list = { 'lettuce': 2, 'snaple': 1, 'berries': 3 }
```

...	
350	'berries': 3
...	
402	'lettuce': 2
...	
800	'snaple': 1
...	

} Memory

* How creating key-value pairs and keying into objects work *
